

University of California, Irvine  
Assistant and Associate Professor Positions in  
Regenerative Medicine and Stem Cell Biology

The University of California, Irvine is planning a major expansion of research in the broad areas of **regenerative medicine** and **stem cell biology** over the next several years as part of a joint initiative by the Sue and Bill Gross Stem Cell Research Center, the Developmental Biology Center, and the Chao Family Comprehensive Cancer Center. We seek outstanding candidates at the Assistant and Associate Professor levels with a demonstrated track record in any of several broadly defined, key areas important to regenerative medicine, such as niche biology, asymmetric cell division, cancer stem cells, tissue engineering, cell matrix interactions, developmental potency/epigenetics, signaling in stem cells and organogenesis. Stem cell research, developmental biology and cancer research have long histories of achievement at UC Irvine and the university has received significant funding from the California Institute of Regenerative Medicine. Core facilities within the Stem Cell Research Center provide lab space for carrying out work that is currently ineligible for federal funding.

Applicants should submit a letter of application, curriculum vitae, bibliography, three letters of reference, and statements of research and teaching interests using the on-line recruitment system (see instructions at <https://recruit.ap.uci.edu>).

Review of applications will begin June 01, 2008 and the recruitment will remain open until the positions are filled.

*The University of California, Irvine is an equal opportunity employer committed to excellence through diversity, and strongly encourages applications from all qualified applicants, including women and minorities. UCI is responsive to the needs of dual career couples, is dedicated to work-life balance through an array of family friendly policies, and is the recipient of an NSF ADVANCE Award for gender equity.*
